

# InCommodities spins off its renewables asset management business

**InCommodities is spinning off its renewables asset management business into a wholly owned subsidiary, InCommodities Asset Management, effective May 1, 2025. This move establishes a dedicated company with a sharper focus on delivering tailored risk management solutions and long-term partnerships in an evolving energy asset management market.**

## **A strategic decision to better serve customers**

The spin-off enables InCommodities Asset Management to operate with full autonomy and a streamlined commercial focus on asset trading and optimization. By removing internal resource competition, this new company can fully dedicate itself to supporting customers in mitigating risks and maximizing opportunities in renewable energy asset management.

*"We are excited to establish InCommodities Asset Management as an independent company,"* said Jesper Johanson, Chairman of InComas

Holding ApS, the parent company of this newly established subsidiary:

*"This is a strategic step forward that allows us to refine our approach to renewables asset management, ensuring our customers receive specialized services designed to meet their evolving needs in an increasingly complex energy landscape."*

## **Dedicated solutions for an expanding market**

As renewable energy assets grow in scale and complexity, the demand for specialized risk management and balancing services is increasing. InCommodities Asset Management brings a powerful portfolio of solutions tailored to shield asset owners from price volatility, optimize output, and ensure reliable market participation.

## **New leadership to drive growth**

Stepping in to lead this new venture, Anders Kring will assume the role of Chief Executive Officer at InCommodities Asset Management, starting

May 1, 2025. Anders Kring joins from Danske Commodities, where he played a pivotal role in developing their renewable asset management business. His expertise in building scalable, customer-focused energy solutions will be instrumental in expanding InCommodities Asset Management's footprint across Europe.

*"I am excited to join InCommodities Asset Management at such a pivotal moment,"* said Anders Kring. *"We have a clear ambition to scale our portfolio and challenge the status quo in the market. The opportunity to build upon InCommodities' success and advance it into a highly specialized, customer-first company is incredibly exciting"*

*"Our goal is to provide long-term, flexible energy solutions that align with our customers' needs and the broader energy transition."*

Anders Kring will shape the management team alongside InCommodities co-founder,

Christian Bach, who will take on the role of CFO of InCommodities Asset Management A/S. Additionally, Andreas Juul has been appointed Chief Commercial Officer (CCO), while Mathias Skovgaard Birk will assume the role of Chief Information Officer (CIO) - both bringing leadership experience from similar roles within InCommodities.

**A seamless transition with a long-term vision**

While the core team and services will remain unchanged, the establishment of InCommodities Asset Management marks a significant step toward a more targeted and commercially driven business model.

Looking ahead, InCommodities Asset Management aims to strengthen its presence across Europe, beyond Germany and the Nordics, with a focus on balancing agreements, fixed-price contracts, flexible assets like battery storage, and other energy assets that support the transition toward net zero.

# About InCommodities

InCommodities is on a mission to rethink energy trading. We specialize in trading power, gas, and emissions, and support wind and solar asset owners in optimizing performance and managing the risks associated with renewable generation.

Our transactions help balance energy markets by matching supply and demand, ensuring security of supply, driving market efficiency,

and contributing to stable, lower energy prices. We play a key role in facilitating the transition to a net-zero energy future.

We challenge the status quo by rethinking how data and technology drive energy trading. Driven by impact, we digitalize and automate where it matters. We combine deep market insights with automation, quantitative analysis, and AI, allowing us to efficiently move

energy across time and geographies, manage renewables output, and store energy until it is needed.

Founded in 2017 in Aarhus, Denmark, InCommodities has grown from four founders to 245+ people with diverse nationalities and educational backgrounds. With offices in Europe, North America, and Asia-Pacific, we conduct trading activities across the globe.
