

InCommodities signs Queensland solar deal with Pacific Blue

Global energy trading company

InCommodities has signed a new solar power purchase agreement (PPA) in Australia with Pacific Blue, securing 230 GWh of clean energy annually from the Haughton Solar Farm in Queensland. This marks another step toward InCommodities' ambition to sign 1 GW of renewable PPAs across Australia and New Zealand by 2027.

The newly signed mid-term PPA with Pacific Blue will begin on January 1, 2026, and is linked to the Haughton Solar Farm in Queensland, delivering 230 GWh of clean energy per year – enough to power more than 40,000 homes annually. The agreement expands the diversity of InCommodities' renewable portfolio while reinforcing its ability to provide world-class risk management services in one of the world's most dynamic energy markets.

Pacific Blue is one of Australia's leading renewable energy companies, with a growing portfolio of wind, solar, and hydro assets across the country.

Andrew Koscharsky, Head of Power Trading for Australia and New Zealand at InCommodities, said: *"InCommodities Australia continues to grow its portfolio through this collaboration with Pacific Blue. Over the coming years, we aim to extend our reach, with additional short- and long term PPAs across solar, wind, and BESS in Australia and also New Zealand".*

This agreement reflects InCommodities' strategy of partnering with leading renewable developers to accelerate the clean energy transition across Australia and New Zealand.

Simon Maan, General Manager Development, Delivery & Commercial, said: *"As one of Australia's top-performing solar farms, Pacific Blue is proud that the Haughton Solar Farm will supply InCommodities with renewable energy harnessed in North Queensland through this PPA. We look forward to supporting InCommodities' strategy and building a strong, long-term partnership."*

Since entering the Australian market in early 2024, InCommodities has established a diverse PPA pipeline within just 18 months – demonstrating both its rapid growth and long-term commitment to accelerating the domestic transition to renewables.

Through leading risk management services and offtake agreements across solar, wind, and BESS (battery energy storage systems), InCommodities is firmly pursuing its ambition of signing 1 GW of renewable PPAs by 2027.

About InCommodities

InCommodities is on a mission to rethink energy trading. We specialize in trading power, gas, and emissions, and support wind and solar asset owners in optimizing performance and managing the risks associated with renewable generation.

Our transactions help balance energy markets by matching supply and demand, ensuring security of supply, driving market efficiency,

and contributing to stable, lower energy prices. We play a key role in facilitating the transition to a net-zero energy future.

We challenge the status quo by rethinking how data and technology drive energy trading. Driven by impact, we digitalize and automate where it matters. We combine deep market insights with automation, quantitative analysis, and AI, allowing us to efficiently move energy

across time and geographies, manage renewables output, and store energy until it is needed.

Founded in 2017 in Aarhus, Denmark, InCommodities has grown from four founders to 250+ people with diverse nationalities and educational backgrounds. With offices in Europe, North America, and Asia-Pacific, we conduct trading activities across the globe.
